

Environmental policy

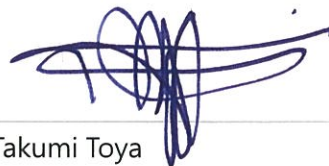

As a global company, we are strongly aware of our social responsibilities and comply with environmental laws and other requirements we subscribe to.

Under the slogan " co-existence of technology and ecology", through environmental activities

promote efforts aimed at a sustainable society. To achieve this, we will work on our business activities by establishing the following "environmental policy".

1. Compliance with domestic and international environmental laws , regulations and other requirements
2. Reduction of carbon dioxide emissions in production activities
3. Efforts to control waste generation and recycling
4. Develop eco-products and production activities
5. Prevent from environmental pollution hereunder;
 - 1) leakage of oils and harmful substances
 - 2) diffusion of noise to outside of site boundaries
